

Semi-annual report of the journal Proceedings of the Institute of Mathematics and Mechanics, NASA for 2022

During the reporting period, it was issued the first number of volume 48 of the journal Proceedings of the Institute of Mathematics and Mechanics of National Academy of Sciences of Azerbaijan. The first issue contains 14 by authors from Azerbaijan, Turkey, South Africa, and Morocco.

The first number of volume 48 includes the following articles:

An inverse problem for the quadratic pencil of differential operators with almost periodic coefficients	3 – 19
by Ashraf D. Orujov	
Symmetry solutions and conserved vectors for a generalized short pulse equation	20 – 39
by Chaudry Masood Khalique and Anila Mehmood	
Phragmen-Lindelof theorem for a class of non-uniformly elliptic equation	40 – 49
by Farman Mamedov and Narmin Amanova	
Infimal Convolution and Duality in Convex Mathematical Programming	50 – 62
by Elimhan N. Mahmudov and Misir J. Mardanov	
On well-defined solvability of the Dirichlet problem for a second order elliptic partial operator-differential equation in Hilbert space	63 – 76
by Hamidulla I. Aslanov and Roya F. Hatamova	
Berezin number of operators	77 – 87
by Mehmet Gurdal and Hamdullah Basaran	
On substitution and extension operators in Banach-Sobolev function spaces	88 – 103
by Eminaga M. Mamedov	
To the inverse spectral problem for a perturbed oscillator on the semiaxis	104 – 112
by Agil Kh. Khanmamedov and Mammad F. Muradov	
On some asymptotically half-linear eigenvalue problem for ordinary differential equations of fourth order	113 – 122
by Masuma M. Mammadova	
Boundedness of the Discrete Ahlfors-Beurling Transform on discrete Morrey spaces	123 – 131
by Rashid A. Aliev, Aynur N. Ahmadova and Aynur F. Huseynli	
On a new parameterized Beta Function	132 – 139
by Mustapha Raïssouli and Mohamed Chergui	
A formula for the approximation of functions by single hidden layer neural networks with weights from two straight lines	140 – 149
by Vugar E. Ismailov	
Optimization of source parameters in non-local boundary conditions of a large system of ODE	150 – 163
by Yegana R. Ashrafova	
Exploring new features for the perturbed Chen-Lee-Liu model via $(m + \frac{1}{G})$-expansion method	164 – 173
by Hasan Bulut and Hajar F. Ismael
