

AMEA Riyaziyyat və Mexanika İnstitutunun Əsərləri jurnalının 2022-ci il üçün hesabatı

Hesabat ilində AMEA Riyaziyyat və Mexanika İnstitutunun Əsərləri jurnalının 48-ci cildinin 1-ci və 2-ci nömrələri çapdan çıxmışdır. Birinci və ikinci nömrədə hər birində uyğun olaraq 14 və 12 məqalə olmaqla Azərbaycan, Türkiyə, Misir, Mərakeş, Braziliya, Tunis və Səudiyyə Ərəbistanından olan müəlliflərin məqalələri dərc edilmişdir.

Jurnalın 48-ci cildinin 1-ci nömrəsində çap edilmiş məqalələr bunlardır:

An inverse problem for the quadratic pencil of differential operators with almost periodic coefficients	3 – 19
by Ashraf D. Orujov	
Symmetry solutions and conserved vectors for a generalized short pulse equation	20 – 39
by Chaudry Masood Khalique and Anila Mehmood	
Phragmen-Lindelof theorem for a class of non-uniformly elliptic equation	40 – 49
by Farman Mamedov and Narmin Amanova	
Infimal Convolution and Duality in Convex Mathematical Programming	50 – 62
by Elimhan N. Mahmudov and Misir J. Mardanov	
On well-defined solvability of the Dirichlet problem for a second order elliptic partial operator-differential equation in Hilbert space	63 – 76
by Hamidulla I. Aslanov and Roya F. Hatamova	
\mathcal{A}-Berezin number of operators	77 – 87
by Mehmet Gurdal and Hamdullah Basaran	
On substitution and extension operators in Banach-Sobolev function spaces	88 – 103
by Eminaga M. Mamedov	
To the inverse spectral problem for a perturbed oscillator on the semiaxis	104 – 112
by Agil Kh. Khanmamedov and Mammad F. Muradov	
On some asymptotically half-linear eigenvalue problem for ordinary differential equations of fourth order	113 – 122
by Masuma M. Mammadova	
Boundedness of the Discrete Ahlfors-Beurling Transform on discrete Morrey spaces	123 – 131
by Rashid A. Aliev, Aynur N. Ahmadova and Aynur F. Huseynli	
On a new parameterized Beta Function	132 – 139
by Mustapha Raïssouli and Mohamed Chergui	

<u>A formula for the approximation of functions by single hidden layer neural networks with weights from two straight lines</u>	140 – 149
by Vugar E. Ismailov	
<u>Optimization of source parameters in non-local boundary conditions of a large system of ODE</u>	150 – 163
by Yegana R. Ashrafova	
<u>Exploring new features for the perturbed Chen-Lee-Liu model via $(m+\frac{1}{G})$-expansion method</u>	164 – 173
by Hasan Bulut and Hajar F. Ismael	

Jurnalın 48-ci cildinin 2-ci nömrəsində çap edilmiş məqalələr bunlardır:

<u>Reverse inequalities for the Berezin number of operators</u>	179 – 189
by Mubariz Garayev, Hocine Guediri and Najla Altwaijry	
<u>Non-coercive solvability of some boundary value problems for second order elliptic differential-operator equations with quadratic complex parameter</u>	190 – 205
by Bahram A. Aliev, Vugar Z. Kerimov and Yakov S. Yakubov	
<u>T-flatness and Bochner flatness of the tangent bundles of Lie groups</u>	206 – 213
by Murat Altunbas	
<u>Uncertainty inequalities for a family of weighted Dirichlet spaces</u>	214 – 223
by Fethi Soltani	
<u>k-Almost Newton-Einstein solitons on Hypersurfaces in generalized Sasakian space forms</u>	224 – 237
by Mohd. Danish Siddiqi, Antonio Wilson Cunha and Shah Alam Siddiqui	
<u>Optimal control problem with coefficients for the equation of vibrations of a thin plate with discontinuous solution</u>	238 – 248
by Hamlet F. Guliyev and Khayala I. Seyfullayeva	
<u>On a solution to a nonlocal inverse coefficient problem using feed-forward neural networks</u>	249 – 258
by Refet Polat	
<u>On Some Tsallis relative operator entropy properties related to Hellinger metrics</u>	259 – 273
by Abdenbi El Hilali, Mohamed Chergui and Bouazza El Wahbi	

<u>Simultaneous-Maximal Approximation by Taylor Partial Sums</u> by Daniyal M. Israfilov, Fatih Celik and Dilek Dilsizoglu	274 – 284
<u>On solvability conditions of boundary value problems for a class of operator-differential equations of the third order in Sobolev type spaces</u> by Araz R. Aliev, Ahmed L. Elbably and Nazila L. Muradova	285 – 294
<u>Optimal control of semilinear higher-order differential inclusions</u> by Dilara Mastaliyeva	295 – 310
<u>On the transformation operator for the Schrödinger equation with an additional increasing potential</u> by Davud H. Orujov	311 – 322

Bundan əlavə jurnalın 48-ci cildinin “New Developments of Computational and Analytic Methods in Science and Engineering” mövzusunda xüsusi buraxılışı nəşr olunmuşdur.

Bu buraxılışda aşağıdakı elmi məqalələr çap olunmuşdur:

<u>Mild Solutions to a Time-Fractional Diffusion Equation with a Hyper-Bessel Operator have a Continuous Dependence with Regard to Fractional Derivative Orders</u> by Ho Duy Binh and Vo Viet Tri	24 – 38
<u>Numerical solution of singular stochastic integral equations of Abel's type using operational matrix method</u> by S. Raja Balachandar, D. Uma, S.G. Venkatesh and H. Jafari	39 – 55
<u>Modified Atangana-Baleanu fractional differential operators</u> by Rabha W. Ibrahim and Dumitru Baleanu	56 – 67
<u>Nonlinear Fractional Order Neutral-type Stochastic Integro-differential System with Rosenblatt Process - A Controllability Exploration</u> by N. Hakkar, M. Lavanya, A. Debbouche and B.S. Vadivoo	68 – 83
<u>Mathematical analysis and simulation of a giving up smoking model within the scope of non-singular derivative</u> by Sumeyra Ucar, Firat Evirgen, Necati Ozdemir and Zakia Hammouch	84 – 99
<u>A study of the Hepatitis B virus infection using Hilfer fractional derivative</u> by Shyamsunder, Sanjay Bhattar, Kamlesh Jangid and Sunil Dutt Purohit	100 – 117
<u>On fractal patterns for multi-wing hyperchaotic attractors with a mirror symmetrical structure</u> by Emile F. Doungmo Goufo	118 – 130

<u>An efficient numerical method based on cubic B-Spline for time dependent problem with small parameter</u>	131 – 152
by Kelthoum Lina Redouane, Nouria Arar and Qasem Al-Mdallal	
<u>On Legendre wavelets for Poisson equation in the frame of complex solution</u>	153 – 167
by Nacereddine Kerrouche and Abdelouahab Kadem	
<u>Analytical solution of generalized diffusion-like equation of fractional order</u>	168 – 177
by Rachana Shokhanda, Pranay Goswami and Juan E. Napoles Valdes	
<u>Analysis and numerical simulation of fractional biological population model with singular and non-singular kernels</u>	178 – 193
by Amit Prakash and Rahul	
<u>Mandelbrot Fractals using Fixed-Point Technique of Sine Function</u>	194 – 214
by Anita Tomar, Swati Antal, Darshana J. Prajapati and Parveen Agarwal
