

Отчёт журнала Труды Института Математики и Механики НАН Азербайджана за 2022 год

За отчетный период вышли 1-е и 2-е номера 48-го тома журнала Труды Института Математики и Механики НАН Азербайджана. В первом и во втором номере опубликовано по 14 и 12 статей в каждой, авторов из Азербайджана, Турции, Египта, Марокко, Бразилии, Туниса, Южной Африки и Саудовской Аравии.

В 1-й номер 48-го тома вошли следующие статьи:

An inverse problem for the quadratic pencil of differential operators with almost periodic coefficients by Ashraf D. Orujov	3 – 19
Symmetry solutions and conserved vectors for a generalized short pulse equation by Chaudry Masood Khalique and Anila Mehmood	20 – 39
Phragmen-Lindelof theorem for a class of non-uniformly elliptic equation by Farman Mamedov and Narmin Amanova	40 – 49
Infimal Convolution and Duality in Convex Mathematical Programming by Elimhan N. Mahmudov and Misir J. Mardanov	50 – 62
On well-defined solvability of the Dirichlet problem for a second order elliptic partial operator-differential equation in Hilbert space by Hamidulla I. Aslanov and Roya F. Hatamova	63 – 76
\mathcal{A}-Berezin number of operators by Mehmet Gurdal and Hamdullah Basaran	77 – 87
On substitution and extension operators in Banach-Sobolev function spaces by Eminaga M. Mamedov	88 – 103
To the inverse spectral problem for a perturbed oscillator on the semiaxis by Agil Kh. Khanmamedov and Mammad F. Muradov	104 – 112
On some asymptotically half-linear eigenvalue problem for ordinary differential equations of fourth order by Masuma M. Mammadova	113 – 122
Boundedness of the Discrete Ahlfors-Beurling Transform on discrete Morrey spaces by Rashid A. Aliev, Aynur N. Ahmadova and Aynur F. Huseynli	123 – 131
On a new parameterized Beta Function by Mustapha Raïssouli and Mohamed Chergui	132 – 139
A formula for the approximation of functions by single hidden layer neural networks with weights from two straight lines by Vugar E. Ismailov	140 – 149
Optimization of source parameters in non-local boundary conditions of a large system of ODE by Yegana R. Ashrafova	150 – 163
Exploring new features for the perturbed Chen-Lee-Liu model via \mathcal{G}-expansion method by Hasan Bulut and Hajar F. Ismael	164 – 173

В 2-й номер 48-го тома вошли следующие статьи:

Reverse inequalities for the Berezin number of operators by Mubariz Garayev, Hocine Guediri and Najla Altwaijry	179 – 189
Non-coercive solvability of some boundary value problems for second order elliptic differential-operator equations with quadratic complex parameter by Bahram A. Aliev, Vugar Z. Kerimov and Yakov S. Yakubov	190 – 205
T-flatness and Bochner flatness of the tangent bundles of Lie groups by Murat Altunbas	206 – 213
Uncertainty inequalities for a family of weighted Dirichlet spaces by Fethi Soltani	214 – 223
\mathbb{S}^k-Almost Newton-Einstein solitons on Hypersurfaces in generalized Sasakian space forms by Mohd. Danish Siddiqi, Antonio Wilson Cunha and Shah Alam Siddiqui	224 – 237
Optimal control problem with coefficients for the equation of vibrations of a thin plate with discontinuous solution by Hamlet F. Guliyev and Khayala I. Seyfullayeva	238 – 248
On a solution to a nonlocal inverse coefficient problem using feed-forward neural networks by Refet Polat	249 – 258
On Some Tsallis relative operator entropy properties related to Hellinger metrics by Abdenbi El Hilali, Mohamed Chergui and Bouazza El Wahbi	259 – 273
Simultaneous-Maximal Approximation by Taylor Partial Sums by Daniyal M. Israfilov, Fatih Celik and Dilek Dilsizoglu	274 – 284
On solvability conditions of boundary value problems for a class of operator-differential equations of the third order in Sobolev type spaces by Araz R. Aliev, Ahmed L. Elbably and Nazila L. Muradova	285 – 294
Optimal control of semilinear higher-order differential inclusions by Dilara Mastaliyeva	295 – 310
On the transformation operator for the Schrödinger equation with an additional increasing potential by Davud H. Orujov	311 – 322

Кроме того, вышел специальный выпуск 48-го тома журнала на

тему "New Developments of Computational and Analytic Methods in science and Engineering".

В данном выпуске опубликованы следующие научные статьи:

<u>Regularization for two inverse problems for conformable heat equation in L^s spaces</u>	3 – 23
by Kim Van Ho Thi	
<u>Mild Solutions to a Time-Fractional Diffusion Equation with a Hyper-Bessel Operator have a Continuous Dependence with Regard to Fractional Derivative Orders</u>	24 – 38
by Ho Duy Binh and Vo Viet Tri	
<u>Numerical solution of singular stochastic integral equations of Abel's type using operational matrix method</u>	39 – 55
by S. Raja Balachandar, D. Uma, S.G. Venkatesh and H. Jafari	
<u>Modified Atangana-Baleanu fractional differential operators</u>	56 – 67
by Rabha W. Ibrahim and Dumitru Baleanu	
<u>Nonlinear Fractional Order Neutral-type Stochastic Integro-differential System with Rosenblatt Process - A Controllability Exploration</u>	68 – 83
by N. Hakkar, M. Lavanya, A. Debbouche and B.S. Vadivoo	
<u>Mathematical analysis and simulation of a giving up smoking model within the scope of non-singular derivative</u>	84 – 99
by Sumeyra Ucar, Firat Evirgen, Necati Ozdemir and Zakia Hammouch	
<u>A study of the Hepatitis B virus infection using Hilfer fractional derivative</u>	100 – 117
by Shyamsunder, Sanjay Bhattar, Kamlesh Jangid and Sunil Dutt Purohit	
<u>On fractal patterns for multi-wing hyperchaotic attractors with a mirror symmetrical structure</u>	118 – 130
by Emile F. DOUNGMO GOUFO	
<u>An efficient numerical method based on cubic B-Spline for time dependent problem with small parameter</u>	131 – 152
by Kelthoum Lina Redouane, Nouria Arar and Qasem Al-Mdallal	
<u>On Legendre wavelets for Poisson equation in the frame of complex solution</u>	153 – 167
by Nacereddine Kerrouche and Abdelouahab Kadem	
<u>Analytical solution of generalized diffusion-like equation of fractional order</u>	168 – 177
by Rachana Shokhanda, Pranay Goswami and Juan E. Napoles Valdes	
<u>Analysis and numerical simulation of fractional biological population model with singular and non-singular kernels</u>	178 – 193
by Amit Prakash and Rahul	
<u>Mandelbrot Fractals using Fixed-Point Technique of Sine Function</u>	194 – 214
by Anita Tomar, Swati Antal, Darshana J. Prajapati and Parveen Agarwal
